

FOR IMMEDIATE RELEASE

20,000 TONNES STOCK PILE CURRENTLY BEING PROCESSED

November 4, 2009 - Vancouver, British Columbia

Larry W. Reaugh, President and Chief Executive Officer of Goldrea Resources Corp. (GOR-TSX.V; Frankfurt-GOJ; Pink Sheets-GORAF) is pleased to report that the processing of the 20,000 tonnes of development material from the Daye Gold Joint Venture (90% Goldrea) commenced on November 2, 2009.

Processing of the gold bearing resource will take approximately 2 weeks. The 20,000 tonnes was obtained from development work and x-cuts accessed by the Golden Rose Shaft. The material graded from 0.5 to 3 grams and the final grade will not be known until completion of processing and refining of the product. The processing is being monitored by Paul Blair, Chief Operating Officer and Director of Goldrea. Future gold bearing material will be produced from underground stopes and production is expected later this year. The Company will have better control of the stope material grade as only a small percentage of the material will come from development and x-cutting. Results of the bulk test will be reported when they are received.

Gold Rush, Arizona and Flap, BC Gold Projects

The Company has received drill permits for both the Flap and Gold Rush programs. The Company will report when the drilling commences on these projects.
