Manson Creek Closes Non-Brokered Financing

Manson Creek Resources Ltd. is pleased to announce that it has closed a non-brokered private placement for 5,000,000 units ("Common Units") at a price of \$0.05 per Common Unit and for 1,666,666 Flow-through Units ("FT Units") at a price of \$0.06 per FT Unit for total gross proceeds of \$350,000.

Each Common Unit consisted of one common share and one common share purchase warrant. Each common share purchase warrant (a "Warrant") will entitle the holder to purchase one common share at a price of \$0.10 per share until November 24, 2011.

Each FT Unit consisted of one common flow-through share and one-half of one common share purchase warrant. Each whole common share purchase warrant (a "Warrant") will entitle the holder to purchase one common share at a price of \$0.10 per share until November 24, 2011.

All securities issued are subject to a hold period until March 25, 2010. A total of 500,000 Common Units and 46,666 FT Units were issued to directors and officers. No finders fees were paid in connection with this financing.

Proceeds of the financing are to be used for general working capital and to fund exploration on the newly acquired Virgin Arm Gold prospect, located 65 kilometers from Gander, Newfoundland. The road accessible, 1047-hectare, Virgin Arm property hosts gold showings over a strike length of three kilometers. Visible gold has been found at several showings along with exceptional assays up to 99.7 grams/tonne (g/t) to 127 g/t gold. Work on the property in 2002 outlined a 2 kilometer long gold in soils anomaly which remains uninvestigated. This early stage project offers tremendous exploration upside as little follow up has been done on the property and no trenching or drilling has been conducted.
