Recommended Windows 7 Settings for Kcast Users

To get the most out of your Kcast application, Kitco strongly recommends the following default settings for your Windows 7 operating system:

**Note:** The Kcast for Windows 7 Taskbar always appears on your Application Tray (bottom left of your window).

**Taskbar Settings**

1. Right-click the Windows taskbar
2. Click Properties
3. Ensure the default settings for the following options:
   - Auto-hide the taskbar should be unchecked
   - *Use small icons* should be unchecked
   - *Always combine, hide labels* should be selected

To display the Kcast icon in the System Tray:

1. Click the arrow icon (*Show hidden icons*).
2. A panel of hidden icons appears.
3. Drag and drop the Kcast icon from the panel to the System Tray.
Desktop Settings

1. Right-click the desktop
2. Click Personalize
3. Choose one of the Aero Themes

Tip: Kcast works best with Aero Themes. If one of the Basic and High Contrast Themes is chosen, the thumbnails of charts will not be displayed properly.
Kcast Control Centre - Navigation

Kcast Control Centre is the core of the Kcast application from where you manage the application and configure its settings. From the Kcast Control Centre you can:

- Select the precious or base metal, indices, and/or currencies that you wish to have displayed on your Application Tray.
- View Technical data
- View Charts
- Configure the Kcast taskbar (i.e. set time, price update frequency, and taskbar icon style)
- Submit feedback
- Access Kitco products and services
- View the application properties

The left section of the Kcast Control Centre displays charts for precious and base metals, oil and indices, and currencies.

The right section displays the taskbar set-up options as well as the configuration options for your Application Tray.

Note: By default, the 24-hour Gold chart is displayed.
To access the Reference Guide:
- Click the question mark icon at the top right corner of the screen.

To minimize the Kcast Control Centre without closing the application:
- Click the down arrow icon at the top right corner of the screen.

To shut down the Kcast application:
- Right-click the Kcast icon in the System Tray and select Shut down Kcast.
View Charts

The left section of the Kcast Control Centre displays charts for the selected precious or base metal, index, or currency.

To change the displayed chart:

1. Select the radio button beside the metal of your choice in the Select chart column.
2. Select your desired time period by hovering over its corresponding time period icon on top of the chart.

Legend:
- 24h = 24 hours
- 3d = 3 days
- 30d = 30 days
- 60d = 60 days
- 6m = 6 months
- 1y = 1 year
- 5y = 5 years
- 10y = 10 years
View the Technical Data/Change Currency and Unit of Measurement

The right section of the Kcast Control Centre displays the following:
- The time the quotes were last updated
- The bid and ask prices
- The change and percentage change

To change the currency of the technical data selected:
- Click on the currency drop-down list and select the desired currency.

To change the measurement for the data selected:
- Click on the unit of measurement drop-down list and select the desired unit.

! Note: Currency selection is available for precious metals only. Measurement selection is available for precious and base metals.

! Note: If the displayed data does not update automatically, click on the Refresh icon.

**Refresh**
Group Application Tray Icons

To save space on your application tray, the precious or base metals, indices, or currencies can be grouped together into a stack. Rest your cursor over a stack to view the current data for each item in the stack. For further information on how hover information is displayed, see View Kcast Toolbar from the Application Tray.

**Note:** Icons for all the technical data available in Kcast can be grouped on the Taskbar. However, grouping can only be done within the same Kcast panel. Thus, for example, while several or all precious metal icons may be grouped into a single stack of taskbar icons, precious and base metals cannot be grouped into a stack.

To **group taskbar icons:**
- Click **Group taskbar icon for precious metals** at the bottom-right of the panel for the respective technical data. The stack will appear as below.
Select Items to Monitor from your Application Tray

The section to the right of the chart in the technical data panel displays the Application Tray setup features. By default the Application Tray displays both the bid and ask prices the precious and base metals. You can select either the bid or ask price, display them both separately, or group them together into one Application Tray icon. For currencies, the bid price is displayed by default.

To select a quote to display on your Application Tray:
- Click the check box in the Bid price, Ask price, or Both column.

Example:
When you select Bid alone for Gold, an icon appears on the Kcast taskbar with the bid price for Gold.

If you select Ask also, another icon appears on the taskbar with the ask price for Gold.

If you select Both, a single icon appears on the taskbar (replacing the other two) with both the bid and ask prices for Gold.

Note: When you close the screen, these changes are saved. The next time you open the application it will display only the quotes you have selected.
Configuration

*Configuration* is the first tab on the top menu. Here, you can set your time zone, language, price update frequency, application tray icon styles and icon colour representation.

**Set time zone**
1. Click the Time zone drop-down list.
2. Select one of the following options: Your local time, New York time, or GMT.

**Language**
- Click the Language drop-down list to choose your language.

**Launch at Start-up**
- Click “Launch Kcast automatically…” to have Kcast launched upon the start-up of your computer.

**Minimize**
- Click “Minimize Kcast…” to automatically minimize the Kcast Control Centre upon the launch of the Kcast program.

**Set frequency for price refresh**
- Slide the price refresh track bar to the desired frequency (example: if the track bar is set to *5 minutes*, the price will be refreshed every 5 minutes).

**Select Kcast taskbar icon styles**
- Select your Kcast taskbar style by clicking the radio button next to your preferred style.

**Select icon color representation**
- Select your Kcast color representation by clicking the radio button next to your preferred representation.

**Save Your Configuration**
- Click Save to capture your recent changes.

! **Note:** Clicking Cancel prior to saving will close the screen and cause all changes to be lost.
Feedback

The Feedback form is accessed from the second tab on the top menu. You can use it to tell us what you think about the application or to have your questions answered.

**Submitting Feedback:**
1. Select a category from the Feedback category drop down list.
2. Enter your email address.
3. Enter a message and click Send.

**Note:** All fields are required. The Send button will remain inactive until all the sections (Category, Email address, and Message) are entered. Check *Remember my email address* if you want the application to remember your email address. If you select this option, your email address will be automatically entered the next time you use the form.
Kitco Products and Services

The Kitco Products tab includes links to the main kitco.com websites.

Click any link to open its corresponding Web page. The links are:

- Bullion products
- Perth Mint Certificates
- Platinum products
- Precision Engineered Products
- Refining and Mill Products
- Pool accounts
- Sell to Kitco
- News headlines
- Reports
- Contributed commentaries
- Press releases
- Kcast suite of applications
- Kcast alerts
- Interactive charts

Kitco Metals Inc. is a pioneering provider of metals market data to customers worldwide. Our suite of Kcast applications brings a world of information to your iPhone, iPad, BlackBerry, Android or Windows Mobile smartphone.

Get instant, on-demand access to live precious and base metal prices, resource industry stock quotes, indices, charts, data, the London Fix, news, analyses and commentaries, all in an easy-to-use, customizable application. Kcast delivers information sourced from kitco.com, the world's number one precious metals information website.

About Kcast

About Kcast, the fourth and last tab on the top menu, contains:
- The application name and version number
- The copyright information
View Kcast Taskbar from the Application Tray

When you hover over a single or group icon, a detailed preview of the metal(s) will be displayed. The same detailed information is also provided in the Kcast Control Centre. Multiple metals stacked on one another will display as in the illustration below. For further information on stacking multiple metals, please see Group Application Tray Icons.

The hover preview shows:
- The bid and ask prices
- The currency (if a precious or base metal)
- The change and percentage change
- The low and high for the respective metal, currency, or index

Click on any item to view its corresponding chart.
Quick Access to Kcast features from the System Tray

You can quickly access all features of the Kcast application from the Kcast icon in the System Tray.

If you do not see the Kcast icon in the System Tray, do the following:
1. Click the arrow icon (Show hidden icons). A panel containing the hidden icons appears.
2. Drag and drop the Kcast icon from the panel to the System tray.

Right click the Kcast icon in the system tray to display a shortcut menu to all Kcast features.

The right-click menu includes:
- Go to Online Store
- Precious Metals Charts
- Base Metals Charts
- Oil & Index Charts
- Currency Charts
- Configure Kcast
- Send Feedback
- Kitco Products
- About Kcast
- Reference Guide
- Rearrange Icons
- Shut down Kcast

Note:
- If your Kcast icons do not display as expected, try using the Rearrange Icons option. Using the Rearrange Icons option resets the icons to the application’s default order of the icons on the Application tray, but takes into consideration your last saved price display checkbox selections.
- The prices are refreshed automatically when you reset the icons display (regardless of the price update frequency that has been set).
- To change the order of display of the icons, drag the icons to the desired position on the Application Tray.
- Clicking the Kcast icon in the System Tray will display the Kcast Control Centre.
