Northcliff Files NI 43-101 Technical Report for Sisson Tungsten-Molybdenum Project Feasibility Study

March 13, Vancouver, British Columbia - Northcliff Resources Ltd. ("Northcliff" or the "Company") (TSX: NCF) announced today that it has filed a National Instrument 43-101 Technical Report (the "Technical Report") for the Feasibility Study of the Company's 100%-owned Sisson Tungsten-Molybdenum Project in central New Brunswick. The positive results as described in the Company's January 29, 2013 news release and further documented in the Technical Report confirm the technical and economic viability of the Sisson Project, which is advancing to the next stage of planning for the CAD $579 million development.

The Technical Report will be available under the Company's profile on SEDAR at www.sedar.com and also accessible through a link to SEDAR on the Company's website at www.northcliffresources.com.

About Northcliff

Northcliff is a mineral resource company associated with Hunter Dickinson Inc. (HDI), and focused on progressing its Sisson Tungsten-Molybdenum Project located in New Brunswick, Canada to production.

CAUTION REGARDING FORWARD-LOOKING INFORMATION

This document contains "forward-looking statements" that are based on Northcliff's expectations, estimates and projections as of the dates as of which those statements were made. Generally, these forward-looking statements can be identified by the use of forward-looking terminology such as "outlook", "anticipate", "project", "target", "believe", "estimate", "expect", "intend", "should" and similar expressions. Forward-looking statements are subject to known and unknown risks, uncertainties and other factors that may cause the Company's actual results, level of activity, performance or achievements to be materially different from those expressed or implied by such forward-looking statements. These include but are not limited to:

• uncertainties and costs related to the Company's exploration and development activities, such as those associated with determining whether mineral resources or reserves exist on a property;
• uncertainties related to feasibility studies that provide estimates of expected or anticipated costs, expenditures and economic returns from a mining project; uncertainties related to expected production rates, timing of production and the cash and total costs of production and milling;
• uncertainties related to the ability to obtain necessary licenses, permits, electricity, surface rights and title for development projects;
• operating and technical difficulties in connection with mining development activities;
• uncertainties related to the accuracy of our mineral reserve and mineral resource estimates and our estimates of future production and future cash and total costs of production, and the geotechnical or hydrogeological nature of ore deposits, and diminishing quantities or grades of mineral reserves;
• uncertainties related to unexpected judicial or regulatory proceedings;
• changes in, and the effects of, the laws, regulations and government policies affecting our mining operations, particularly laws, regulations and policies relating to mine expansions, environmental protection and associated compliance costs arising from exploration, mine development, mine operations and mine closures;
• expected effective future tax rates in jurisdictions in which our operations are located;
• the protection of the health and safety of mine workers; and
• mineral rights ownership in countries where our mineral deposits are located;
• changes in general economic conditions, the financial markets and in the demand and market price for gold, silver and other minerals and commodities, such as diesel fuel, coal, petroleum coke, steel, concrete, electricity and other forms of energy, mining equipment, and fluctuations in exchange rates, particularly with respect to the value of the U.S. dollar and Canadian dollar;
• unusual or unexpected formation, cave-ins, flooding, pressures, and precious metals losses, or other similar events (and the risk of inadequate insurance or inability to obtain insurance to cover these risks);
• changes in accounting policies and methods we use to report our financial condition, including uncertainties associated with critical accounting assumptions and estimates;
• environmental issues and liabilities associated with mining including processing and stock piling ore;
• geopolitical uncertainty and political and economic instability in countries which we operate; and
• labour strikes, work stoppages, or other interruptions to, or difficulties in, the employment of labour in markets in which we operate mineral projects or mines, or environmental hazards, industrial accidents or other events or occurrences, including third party interference that interrupt the production of minerals in our mines.
