Nevada Gold & Copper LLC Announces Private Placement

Reno, Nevada – October 11, 2018 – Nevada Gold & Copper LLC (the Company) is pleased to announce a non-brokered private placement for up to 5,000 common shares ("Units") of the Company at an asking price of \$100.00 per share (Unit) for aggregate cash proceeds of up to \$500,000. The total number of shares issued to Members and in company treasury prior to this offering is only 7000 Units.

The proceeds will be used to advance the Company's Fox Spring (gold and copper porphyry) Project in Nevada and for general working capital. This offering will be available to any and all persons or entities until this offering is fully subscribed or cancelled at NG&C Management's and Members' discretion.

The company is requiring a minimum purchase of 100 shares (Units). All reasonable bids will be considered. Finders' fees may be payable on all or a portion of the funds raised under this financing.

About Nevada Gold & Copper, LLC

Nevada Gold & Copper LLC is a privately held Reno, Nevada-based gold and copper exploration company. Founded in 2017, the Company is a Nevada registered Limited Liability Company. The Company is considered a Junior Exploration Company in mining industry terms.

Junior Exploration Companies serve as the "R&D" scouts of the mining industry. Major gold and copper producing companies depend heavily on gold and copper discoveries by smaller, independent exploration groups to provide future gold and copper reserves. Major mining companies often acquire many of their new gold and copper deposits by merger and acquisition of these smaller exploration groups.

Nevada Gold & Copper LLC's business model is straight forward: explore for and acquire properties that have the best possibility of containing economical gold and copper, upgrade the properties to demonstrate the existence of gold and copper through mapping, sampling, and drilling, and place the properties with major mining companies through joint venture, merger or acquisition.

The Company is owned by "Members" and uses the "Manager Managed" structure.

Company Members hold "Units" of interest in the Company and are assigned a percentage ownership of the company according to the number of Units held.

Certain Company business matters are decided by a vote of the Members. The percentage of Members ownership in the Company determines the weight of each Members vote. Currently, there are 15 Members holding a total of 5000 shares (Units) of the Company.

For tax purposes, the Company currently uses the "pass through" income tax designation. That is, Members report their share of the profits (losses) on their tax return.

About the Fox Spring Project

The Fox Spring Project is Nevada Gold & Copper's flagship porphyry gold and copper property that has district scale potential. Located in the southern Jackson Mountains of Humboldt County, it is approximately 150 miles northeast of Reno and 55 miles west of Winnemucca, Nevada and currently consists of 25 unpatented claims.

To date, approximately \$540,000 has been spent on the Fox Spring Project since 2011 by the Company and its immediate predecessor, Grizzly Gold Corp. Expenditures consisted of initial reconnaissance, claim staking, mapping, sampling, a first phase of drilling, a geophysical (IP) survey and G&A expenditures.

Cautionary Note Regarding Forward-Looking Statements

Forward Looking Information: This news release includes certain information that may be deemed "forward looking information". Forward-looking information can generally be identified by the use of forward-looking terminology such as "may", "will", "expect", "intend", "estimate", "anticipate", "believe", "continue", "plans" or similar terminology. All information in this release, other than information of historical facts, including, without limitation, the availability of financing to the Company are forward-looking information that involve various risks and uncertainties. Although the Company believes that the expectations expressed in such

forward-looking information are based on reasonable assumptions, such expectations are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking information. Forward-looking information is based on a number of material factors and assumptions. Factors that could cause actual results to differ materially from the forward-looking information include changes in project parameters as plans continue to be refined, future metal prices, availability of capital and financing on acceptable terms, general economic, market or business conditions, regulatory changes, delays in receiving approvals, and other risks detailed herein and from time to time in the filings made by the Company with securities regulatory authorities in the USA. Mineral exploration and development of mines is an inherently risky business. Accordingly, actual events may differ materially from those projected in the forward-looking information. Readers are cautioned not to place undue reliance on forward-looking information. The Company does not undertake to update any forward-looking information, except in accordance with applicable securities laws.
